06 Green from the Get-Go

Though the idea of a company or large corporation using environmentally friendly tactics is a common strategy today, that wasn't always the case.

08 10 Great Careers in Energy

There will always be great careers awaiting interested job seekers in the energy industry, even if people find a way to power a car through water.

12 Where Have all the Green Jobs Gone?

With small entrepreneurial companies and retailing behemoths like Wal-Mart pushing the envelope, green is big business.

16 Best Cities for Green Jobs

If you're one of these green-minded professionals, check out the following cities in which you have a better-than-average shot at landing that energy efficient dream job.

18 What We're Doing

Not only individuals but big corporations are joining together in an effort to save our planet. CareerBuilder's green efforts extend to other continents beyond North America.

20 New & Emerging Green Jobs

Earlier this year the United Nations Environment Programme, UNEP, released a report that stated the emerging green economy would require the creation of "millions of jobs."

FEATURED EMPLOYER

United Water begins with U.

WATER IS OUR LIFE.

United Water provides comprehensive, sustainable water and wastewater management solutions that promote public, economic and environmental health.

We are innovators...

With the world's largest water and wastewater research program, United Water and our corporate parent, Suez Environnement, devote global resources to create local solutions. Whether it is high-efficiency ozone technology in Haworth, NJ, membrane filtration in San Antonio, TX, or reverse osmosis desalination in Rockland County, NY, the communities and clients we serve can depend upon truly state-of-the-art operational and management technologies that best meet their needs.

...good neighbors...

Not only in times of crisis, but every day, United Water works hard to make all of our communities better places to live. We proudly donate approximately \$1.5 million each year in contributions and in-kind services to help local environmental, educational and humanitarian organizations accomplish their objectives.

...and environmental champions.

Our mission is to provide clean drinking water and to treat wastewater so it can be safely used to replenish rivers and streams. For example, in West Basin, CA, we operate an innovative plant that recycles wastewater for irrigation and industrial use. This facility manages the demand for scarce water supplies, conserves drinking water, and helps to safeguard the ocean.

Among the awards we have received:

- California Plant-of-the-Year Award
- Pennsylvania Water Environment Association Award
- Energy Efficiency Forum Innovative Energy Management Award

GET INTO WATER.

United Water offers a stimulating and diverse workplace culture that aims to empower and develop employees. In return, we ask our employees to contribute their best, every day.
